# E-commerce website for Caramels and Almonds
## Quantitative Analysis

| Risk ID | Risk | Impact | Probability | Solution |
|---|---|---|---|---|
| 1 | First system created for the business | High | High | Provide the business owner with user manuals on how to use the system. Train the client, who is the administrator of this system, on how to perform the necessary operations. |
| 2 | High product costs | Medium | Medium | Notify the client that there might be some changes in the estimated budget for this website created for 'Caramels and Almonds' in the future. |
| 3 | The planned technologies might not support all the features. | Medium | Low | The project team members will have to assess the situations, plan for unexpected events, and handle each situation individually. |
| 4 | Demand for the website goes up | Medium | Low | The project team members should keep an eye on the website traffic after launching it to make sure the hosting environment can handle the demand. If not, you should upgrade the plan or move the website to a different service provider that can. |
| 5 | The project team might have to face some limitations | High | Medium | Assess the circumstances, plan for unforeseen circumstances, and handle each situation individually. |
| 6 | Problems in time management | Medium | Medium | Other team members can help out if someone is unable to finish their task in a timely manner. |

| 7 | Not every theme supports WooCommerce | Low | Low | Making changes to the technology or the theme can help to reduce this risk. |
|---|---|---|---|---|
| 8 | Having trouble when trying to schedule a meeting with the client | Medium | High | The team members communicated with the client through WhatsApp during her free time instead of participating in Zoom sessions. |
| 9 | List of items was not provided on time | High | Medium | Rearrange the tasks in accordance with the due dates, or inform the client again and make the necessary arrangements. |
| 10 | Sudden issues for project team members | Medium | Medium | The project manager can have discussions with the team members and make necessary plans. |
